

# CUBS

For the month of February children did lot of activities with heart stickers, mess free art, sensory artwork that includes sticky wall heart shape sponge. All of the activities encourage children's fine motor skills, learning words like heart, love, happy, caring, friendship.

A handprint Valentine's tree craft is a fun and sentimental project where children create a tree-like artwork by using their handprints as the trunk and branches.

Most of our children showed independence in handling spoons, holding cups. We are still working on encouraging them to follow simple instructions, gentle hands and sharing and caring rules.

# TEDDIES

The Teddies embark on a colorful adventure as they explore a dazzling spectrum through imaginative art, creative pattern-building, and expressive painting sessions.

# KOALAS

Koalas Explore the Animal Kingdom!

This week, the Koalas have been fully immersed in our exciting animal theme. They had fun cleaning and rescuing animals in the water, engaging in imaginative play. They also got creative with playdough, shaping dinosaurs and bringing their favorite creatures to life. It's been a hands-on, engaging experience that sparked curiosity and joy!

# PANDAS

February was all about friendship and kindness in the Panda Classroom! Throughout the month, we read stories, played games, and created art that helped us learn how to be good friends. For Valentine's Day, each child decorated a paper bag to collect valentines from their classmates. Thank you for sending your valentine cards! Everyone enjoyed sharing and receiving them! Our celebration on Valentine's Day was filled with love, laughter, and friendship.

# BEARS

This month the bear club focused on puppets and the art of puppet making as the children are very interested in our puppet friends. So we decided to design our own puppets to play with. These include finger puppets, stick puppets, brown bag puppets etc. By doing this craft activity kids are using their imagination, fine motor skills, and creativity. Playing with puppets is very beneficial for the kids as they try to imagine different things the puppet character may say. Children can use new words as well expressions and listening skills, building self confidence
